## I. Customer Group without Tax overview

Magento Customer Group without Tax extension has ability to reject taxes on category page and product page. Also, customers won't see tax rate in their cart and check out with pay no tax. This unique extension also allows admin apply for specific customers and individual customer groups while tax rates are still shown to remained customers. Hence, it's really useful for your website's marketing and sale policy.

## II. Why is the Customer Group Without Tax extension your must-have item?

An e-commerce company actually owns various types of customer as well as different parts of online market. Because each customer groups always have different characteristics (such as: shopping habit, taste, demand...), Shop owners try to apply different policies for specific groups of customer. However, we all know that pricing and tax policies seem like the two strongest programs attracting customers.

This extension Customer Group Without Tax, as introduced above, is a useful extension solving most of problems. Again, it enables some special groups of customer to pay for the order without tax and some other groups to pay with tax when checking out. This is effective for your sale policy to control customer payment process by applying taxes or not.

- *Apply preferential prices for special customer groups to catch their attention.*
- *Attract customer groups whom your company wants to induce*
- *Solid quality code*
- *Full support from our service: Free commercial products installation services; and 3 months of free guaranteed support.*

### III. How Customer Group without Tax works

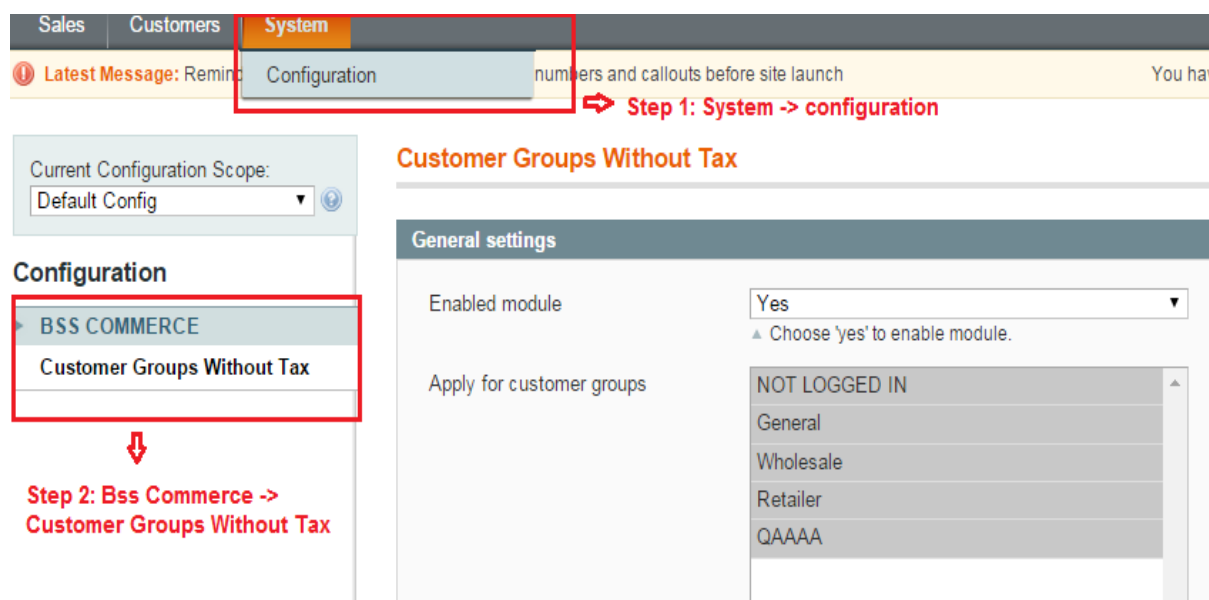

#### 3.1. Instruction Manual

As an admin, you can set up your own store page by the most effective way that supports your trading objective. To make the configuration:

- Step 1: Go to **System => Configuration**.
- Step 2: At the left side of the page, find **BSS Commerce => select Customer**

#### **Group Without Tax**

After this 2 steps, a screen for configuration appears like the following picture:

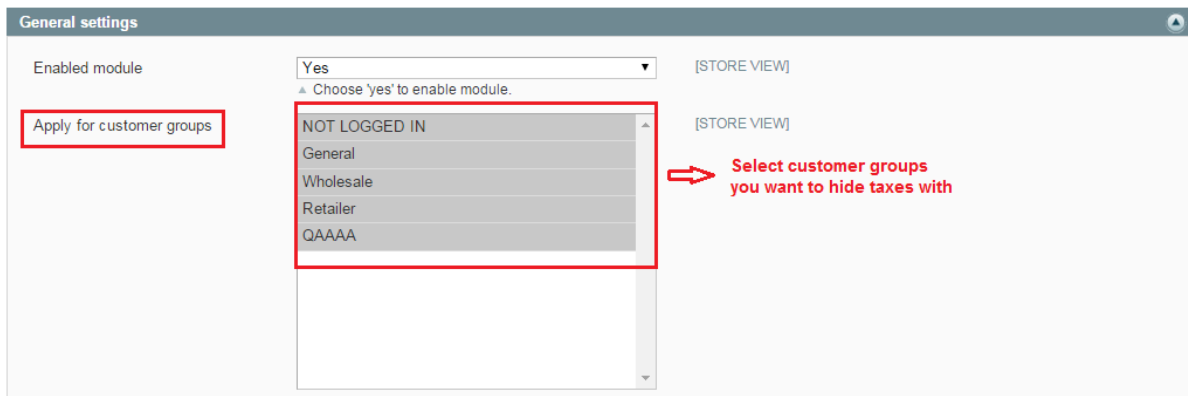

In box **Enable module**, choose *Yes* to enable the module. After being enabled, a box named **Apply for customer groups** will appear for you to continue configuring the extension.

In the box **Apply for customer groups**, select one, some or all customer groups' names which you want to reject taxes on website view.

Customer Groups Without Tax

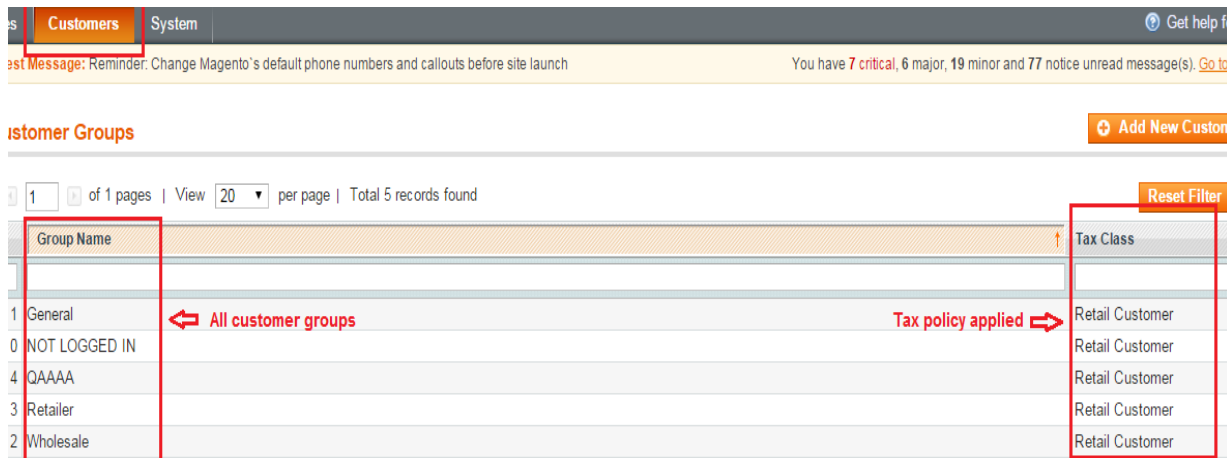

Save Config

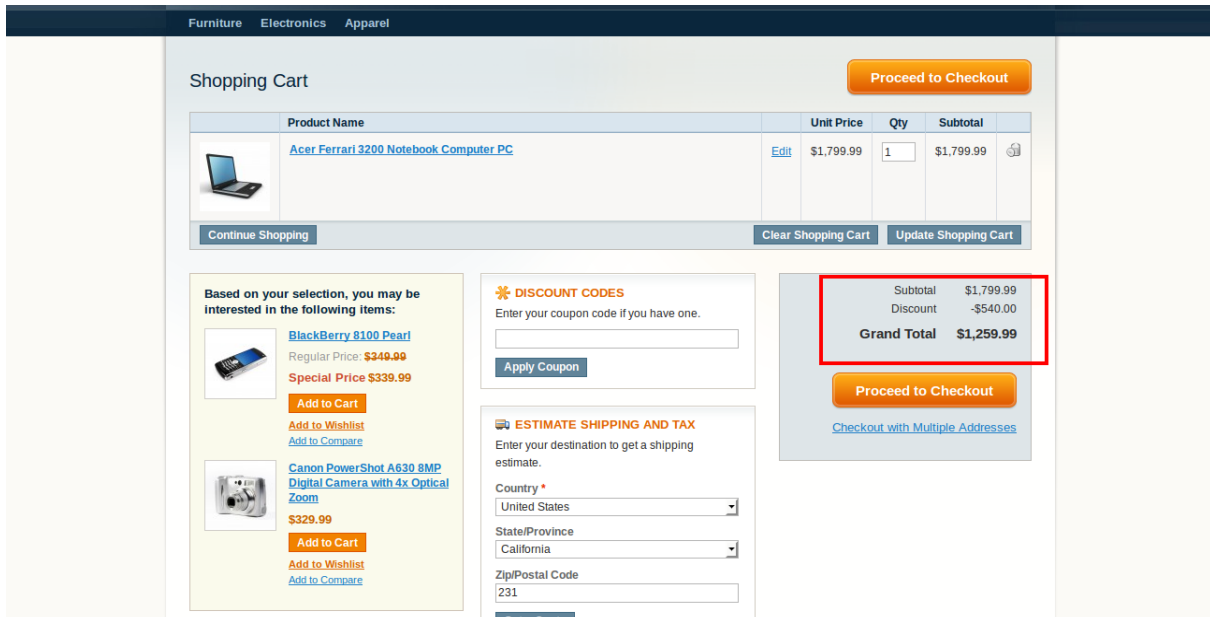

After all above configuration is done, you save the configuration by clicking on **Save config** button to the right of the backend. To see the change, go to frontend and reload the page.

### 3.2. Preview tax policy on customer groups

To preview which customer group is applied tax policy, go to **Admin Panel -> Customers -> Customer Groups**. All groups of customer will be shown with applied tax policy like this following picture:

The result in frontend when applying Magento Customer Group without Tax will be shown like this:

The screenshot displays a Magento shopping cart interface. At the top, there are navigation links for Furniture, Electronics, and Apparel. The main heading is "Shopping Cart" with a "Proceed to Checkout" button. Below this is a table listing the items in the cart:

Product Name	Unit Price	Qty	Subtotal
 Acer Ferrari 3200 Notebook Computer PC	\$1,799.99	1	\$1,799.99

Below the table are buttons for "Continue Shopping", "Clear Shopping Cart", and "Update Shopping Cart". To the left, there are recommendations for other products like BlackBerry 8100 Pearl and Canon PowerShot A630 8MP Digital Camera. In the center, there is a "DISCOUNT CODES" section with a coupon code input field and an "ESTIMATE SHIPPING AND TAX" section with dropdown menus for Country (United States), State/Province (California), and Zip/Postal Code (231). On the right, a summary table shows the Subtotal (\$1,799.99), Discount (-\$540.00), and Grand Total (\$1,259.99), which is highlighted with a red box. A "Proceed to Checkout" button is also present in this summary area.
