I. Percentage Tier Price Overview

BSS Percentage Tier Price extension extends default Magento Tier Price function by allowing admin to define tier prices as a percentage.

- Easily set up tier price based on standard price or group price
- Set tier price in a fixed amount or in percentage
- Automatically update tier price when price is changed

BSS Percentage Tier Price updates the tier prices according to the percentages you have inputted when you update the price of your product. This extension will effectively reduce your time-consuming and optimize your sale activity.

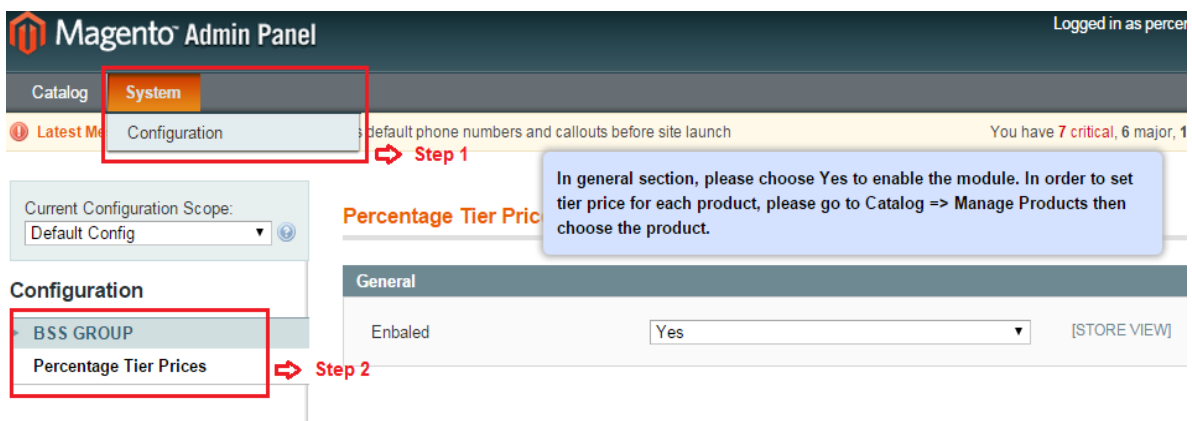

II. How does Percentage Tier Price Extension work?

2.1. Instruction Manual

As an admin, you can set up your own store page by the most effective way that supports your trading objective. To polish the website configuration:

- Step 1: Go to **Admin Panel => System => Configuration.**
- Step 2: At the left side of the page, find **BSS Commerce => select Percentage Tier Price**

After these 2 steps, a screen for configuration appears like the following picture:

The **General** tab appears with a box named “**Enabled**” for admin to enable **Percentage Tier Price** extension. There are 2 options in the box: *Yes* or *No*. Choose *Yes* to enable the extension, choose *No* to not.

After that, don’t forget to click on **Save config** button to continue the configuration.

2.2. Set up tier price in percentage or a fix amount based on standard price or group price

To continue setting up tier price based on standard price or group price for each product, go to **Catalog => Manage Products**.

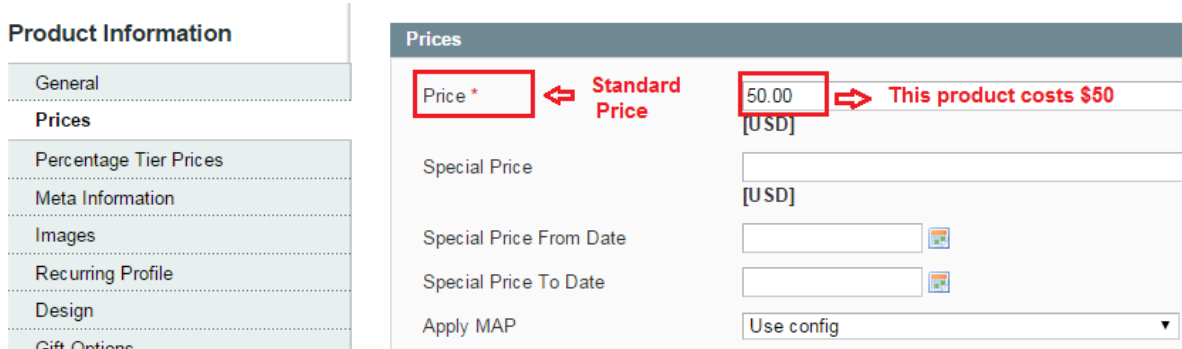

The list of all products that are available in your own store is shown up.

Click on **Edit** button at right side to set up tier price for each shown-up product on the list.

The screenshot displays the 'Manage Products' page. At the top, there is a 'Manage Products' header and an 'Add Product' button. Below the header, there are filters for 'Choose Store View' (All Store Views) and pagination information (Page 1 of 30 pages, View 20 per page, Total 581 records found). There are also buttons for 'Reset Filter' and 'Search'. The main content is a table with the following columns: ID, Name, Type, Attrib. Set Name, SKU, Price, Qty, Visibility, Status, Websites, and Action. The table contains five rows of product data. A red box highlights the 'Name' column for the first five rows, with a red arrow pointing to the 'Name' column header and the text 'Products' name'. Another red box highlights the 'Action' column for the same five rows, with a red arrow pointing to the 'Edit' button and the text 'Click "edit" to set up tier price for each product'.

ID	Name	Type	Attrib. Set Name	SKU	Price	Qty	Visibility	Status	Websites	Action
887	My Bundle Product	Bundle Product	Default	ABC 234			0 Catalog, Search	Enabled		Edit
886	My Configurable Product-Black-10	Simple Product	My Attribute Set	ABC 456-Black-10	\$50.00	10	Not Visible Individually	Enabled		Edit
885	My Configurable Product-Black-8	Simple Product	My Attribute Set	ABC 456-Black-8	\$50.00	10	Not Visible Individually	Enabled		Edit
884	My Configurable Product-Black-6	Simple Product	My Attribute Set	ABC 456-Black-6	\$50.00	10	Not Visible Individually	Enabled		Edit
883	My Configurable Product	Configurable Product	My Attribute Set	ABC 456	\$50.00	0	Catalog, Search	Enabled	Main Website	Edit

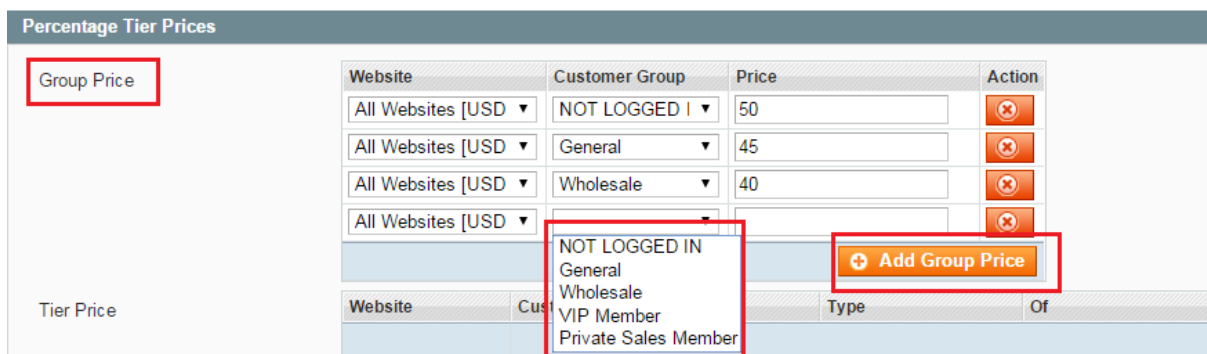

After choose to edit the product price, go to board **Product Information** on the left => choose **Price** to see *standard price*.

In this example, **standard price of the product which being set up tier price is \$50.*

Next, go to **Percentage Tier Price** to set up the tier price as you want. There are 2 sections for admin to configure: **Group Price** and **Tier Price**.

+ In **Group Price**, click on **Add Group Price** button to add specific price for each customer group.

In this example, the **group price for “Not logged in” customers is \$50, for “General” customers is \$45, for **Wholesalers** is \$40.*

+ In **Tier Price**, click on **Add Tier** button to set up tier price in percentage or a fixed amount for each customer group based on *Standard price* and *Group price*.

There are 4 criterias admin need to know and fill in: *Customer Group, Quantity, Discount Type, Applied Price, Tier Value*.

Tier Price

Website	Customer Group	Qty	Type	Of	Value	Action
All Websites [v]	NOT LOGGED IN [v]	5 and above	Fixed [v]	[v]	47	[x]
All Websites [v]	General [v]	10 and above	% Discount [v]	Standard Price [v]	5	[x]
All Websites [v]	Wholesale [v]	15 and above	% Discount [v]	Group Price [v]	10	[x]
All Websites [v]	VIP Member [v]	and above	[v]	[v]		[x]

+ Add Tier

- In **Customer Group** column, choose each customer group (E.g: *Not Logged In*, *General*, *Wholesale*, *VIP Member*, *Private Sales Member*...) you want to set tier price on.
- In **Qty** column, fill minimum quantity of product which each customer group has to buy with to get the tier price.
- In **Type** column, there are 2 types of discount: *Fixed* and *% Discount*. Choose one of them to apply on new tier price.
- In **Of** column, choose 1 of 2 options to apply discount on: *Standard Price* and *Group Price*. Remember that if admin choose *Fixed* on **Type** column, this section is disabled.
- In **Value** column, fill with new value for tier price by a new dollar amount (for fixed discount) or by percentage (for % discount)

**For this example:*

- Only when not-logged-in customers buy this product with at least 5 items, they will get the new tiered price which is fixed-discount (\$47).

- Only when general customers buy this product with at least 10 items, they will get the new tier price which is 5% discount on the standard price (\$50).

*The new tier price = \$50 - \$50*5% = \$47.5*

- Only when the wholesalers buy this product with at least 15 items, they will get the tier price which is 10% discount on the group price (\$40)

*The new tier price = \$40 - \$40*10% = \$36*

After all, click on **Save** or **Save and continue edit** buttons to save the configuration. All the tier prices will be automatically updated and displayed on frontend

III. Why Percentage Tier Price is a must-have extension?

➤ **Reduce admin's time for tier price re-update steps whenever there is any change in product prices.**

Once BSS Percentage Tier Price Extension is installed in your store, whenever there is an update in the price, the tiered price will be automatically changed to match with the price update. To understand how BSS Percentage Tired Pricing extension works, let's take a look at this simple example. If you want to constantly give customers a 15% discount for ordering more than a specific amount of products, it's really difficult to constantly update this tier price every time the product price changes. Now, with BSS Percentage Tired Pricing, you can set the tier price to 10% and it will automatically update for you!

➤ **Give more choices for store owners to differentiate their price strategies**

BSS Percentage Tier Price extension also supports discount in percentage for group price which sets promotional prices for different customer groups at the product level. Therefore, store owners have more choices to differentiate their price strategies which definitely make your online store more competitive on the market.

For example, admin can set group price for wholesale customers. While the standard price is \$50, the price for wholesale customers is \$45. In tier price box, for wholesale group, admin set the tier price for them based on percentage of their group price (\$45) so that whenever the quantity of products of a wholesale order is 10 or above, the wholesale customer will get a discount of 10% based on the wholesale price (\$45).
