1. Percentage Tier Price Extension Overview

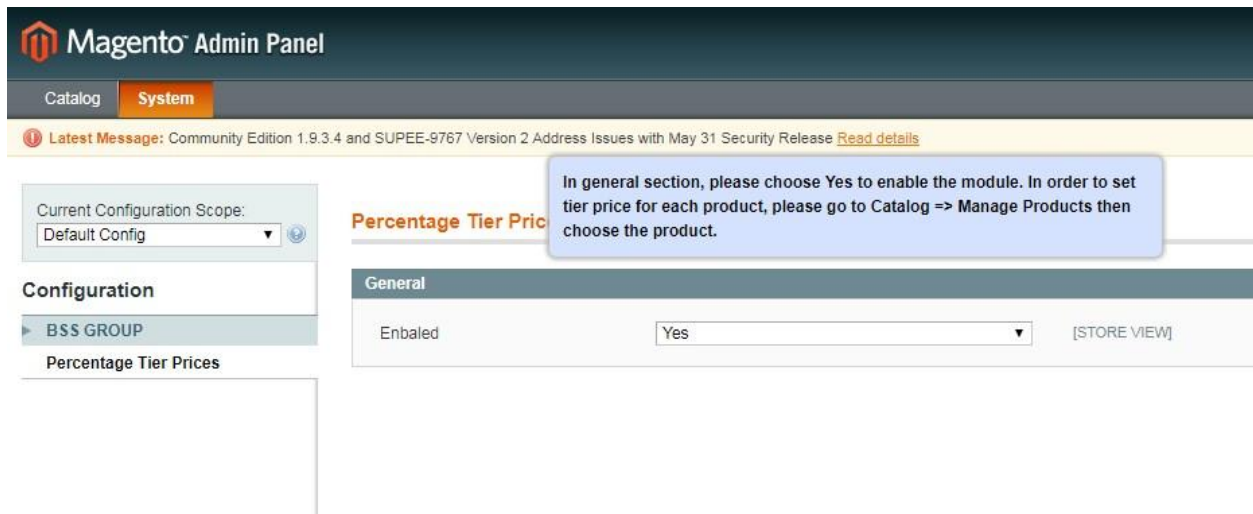

[Percentage Tier Price](#) extends default Magento Tier Price function by allowing admin to define tier prices as a percentage.

Percentage Tier Price updates the tier prices according to the percentages you have inputted when you update the price of your product. This extension will effectively reduce your time-consuming and optimizes your sale activity.

2. How does Percentage Tier Price Extension Work?

2.1. Instruction Manual

Go through **Admin Panel** → **System** → **Configuration** → **BSS Group** → **Percentage Tier Prices**

In **General** tab, in **Enabled**, there are 2 options in the box: **Yes** or **No**. Choose **Yes** to enable the extension.

After that, don't forget to click on **Save config** button to continue the configuration.

2.2. Set up tier price in percentage or a fix amount based on standard price or group price

To continue setting up tier price based on standard price or group price for each product, go to **Catalog → Manage Products**.

The list of all products that are available in your own store is shown up.

Click on **Edit** button at right side to set up tier price for each shown-up product on the list.

The screenshot shows the 'Manage Products' page. At the top, there is a 'Manage Products' header and an 'Add Product' button. Below the header, there are filters for 'Choose Store View' (All Store Views) and pagination information (Page 1 of 30 pages, 20 items per page, Total 581 records found). A table of products is displayed with columns: ID, Name, Type, Attrib. Set Name, SKU, Price, Qty, Visibility, Status, Websites, and Action. The 'Name' column contains a red box with an upward arrow and the text 'Products' name'. The 'Action' column contains an 'Edit' button for the product 'My Configurable Product-Black-10'. A red box highlights this 'Edit' button, and a red arrow points to it with the text 'Click "edit" to set up tier price for each product'.

ID	Name	Type	Attrib. Set Name	SKU	Price	Qty	Visibility	Status	Websites	Action
887	My Bundle Product	Bundle Product	Default	ABC 234			0 Catalog, Search	Enabled		Edit
886	My Configurable Product-Black-10	Simple Product	My Attribute Set	ABC 456-Black-10	\$50.00	10	Not Visible Individually	Enabled		Edit
885	My Configurable Product-Black-8	Simple Product	My Attribute Set	ABC 456-Black-8	\$50.00	10	Not Visible Individually	Enabled		Edit
884	My Configurable Product-Black-6	Simple Product	My Attribute Set	ABC 456-Black-6	\$50.00	10	Not Visible Individually	Enabled		Edit
883	My Configurable Product	Configurable Product	My Attribute Set	ABC 456	\$50.00	0	Catalog, Search	Enabled	Main Website	Edit

After choose to edit the product price, go to board **Product Information** on the left

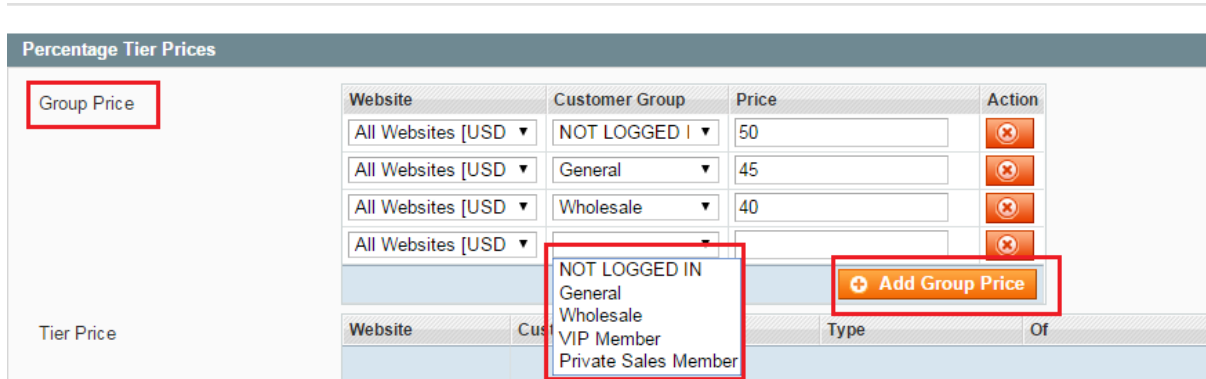

→ choose **Price** to see *standard price*.

The screenshot shows the 'Product Information' page. On the left, there is a sidebar with a 'Product Information' header and a list of sections: General, Prices, Percentage Tier Prices, Meta Information, Images, Recurring Profile, Design, and Gift Options. The 'Prices' section is selected. The main content area shows the 'Prices' section with a 'Price *' field highlighted in a red box. A red arrow points to this field with the text 'Standard Price'. The value '50.00' is entered in the field, and a red arrow points to it with the text 'This product costs \$50'. Below the 'Price *' field, there are fields for 'Special Price', 'Special Price From Date', 'Special Price To Date', and 'Apply MAP'.

In this example, **standard price** of the product which being set up tier price is \$50.

Next, go to **Percentage Tier Price** to set up the tier price as you want. There are 2 sections for admin to configure: **Group Price** and **Tier Price**.

- In **Group Price**, click on **Add Group Price** button to add specific price for each customer

*In this example, the **group price** for “Not logged in” customers is \$50, for “General” customers is \$45, for **Wholesalers** is \$40.

- In **Tier Price**, click on **Add Tier** button to set up tier price in percentage or a fixed amount for each customer group based on **Standard price** and **Group price**.

There are 4 criterias admin need to know and fill in: **Customer Group**, **Quantity**, **Discount Type**, **Applied Price** and **Value**.

- In **Customer Group** column, choose each customer group (E.g: **Not Logged In**, **General**, **Wholesale**, **VIP Member**, **Private Sales Member**...) you want to set tier price on.

- In **Qty** column, fill minimum quantity of product which each customer group has to buy with to get the tier price.
- In **Type** column, there are 2 types of discount: **Fixed** and **% Discount**. Choose one of them to apply on new tier price.
- In **Of** column, choose 1 of 2 options to apply discount on: **Standard Price** and **Group Price**. Remember that if admin chooses **Fixed** on **Type** column, this section is disabled.
- In **Value** column, fill with new value for tier price by a new dollar amount (for fixed price) or by percentage (for % discount)

For this example:

- *Only when not-logged-in customers buy this product with at least 5 items, they will get the new tier price which is fixed (\$47).*
- *Only when general customers buy this product with at least 10 items, they will get the new tier price which is 5% discount on the standard price (\$50).*

$$\text{The new tier price} = \$50 - \$50 * 5\% = \$47.5$$

- *Only when the wholesalers buy this product with at least 15 items, they will get the tier price which is 10% discount on the group price (\$40)*

$$\text{The new tier price} = \$40 - \$40 * 10\% = \$36$$

After all, click on **Save** or **Save and continue edit** buttons to save the configuration. All the tier prices will be automatically updated and displayed on frontend.
