I. BSS Wholesale Fast Order Extension Overview

Recently many researches have proved that even one second delay in buying process can engage your loyal customers in abandoning your online store. Therefore, you can enhance your online store performance and encourage customers to start searching and selecting products by using **Wholesale Fast Order by BSS Commerce** right now.

II. How does BSS Wholesale Fast Order Extension work?

1. How to use functions of BSS Wholesale Fast Order Extension

Wholesale Fast Order is a very useful extension that allows selecting multiple products at the same time and then adding them to shopping cart without spending too much time purchasing one by one. By this way, Wholesale Fast Order can optimize order process and decrease buying time by following these steps:

Step 1: Click **“Fast Order”** shortcut in the right side of the website

When you install BSS Wholesale Fast Order Extension, Fast Order shortcut will appear in the right side of your website. Customers click to Fast Order shortcut and there is a Fast Order pop up for them to search.

MOBILE

SORT BY: Position ↑ VIEW AS: 6 Item(s) SHOW: 12

Product Name	Price
IPHONE 4	\$200.00
SAMSUNG GALAXY A7	\$490.00
SAM SUNG ALPHA	\$460.00
TEST	\$99.00

RECENTLY VIEWED PRODUCTS

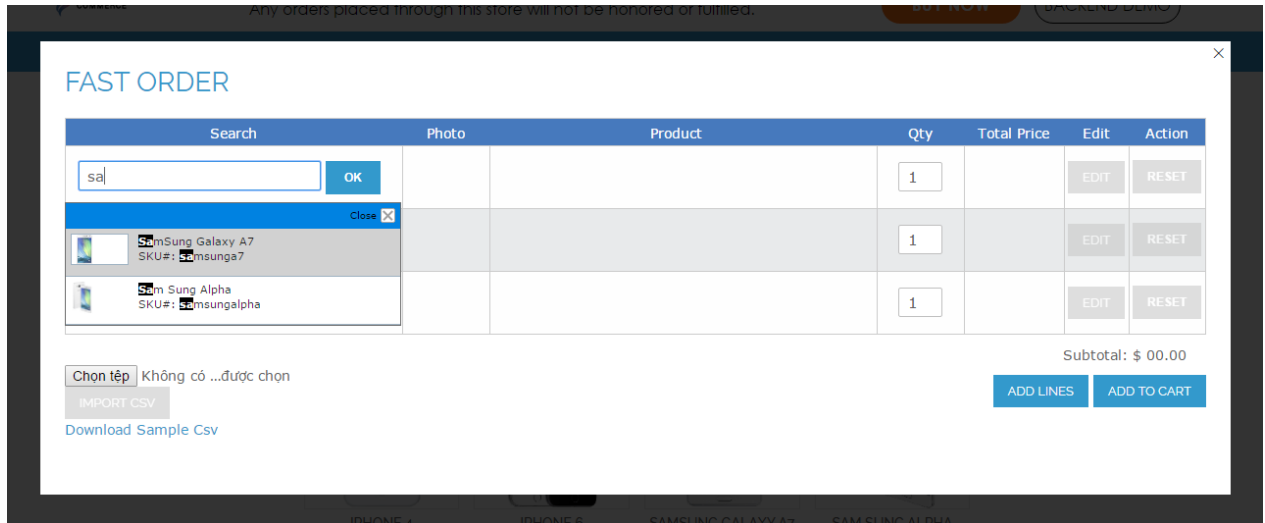

- IPHONE 4
- SAMSUNG GALAXY A7
- IPHONE 6S

COMPARE PRODUCTS

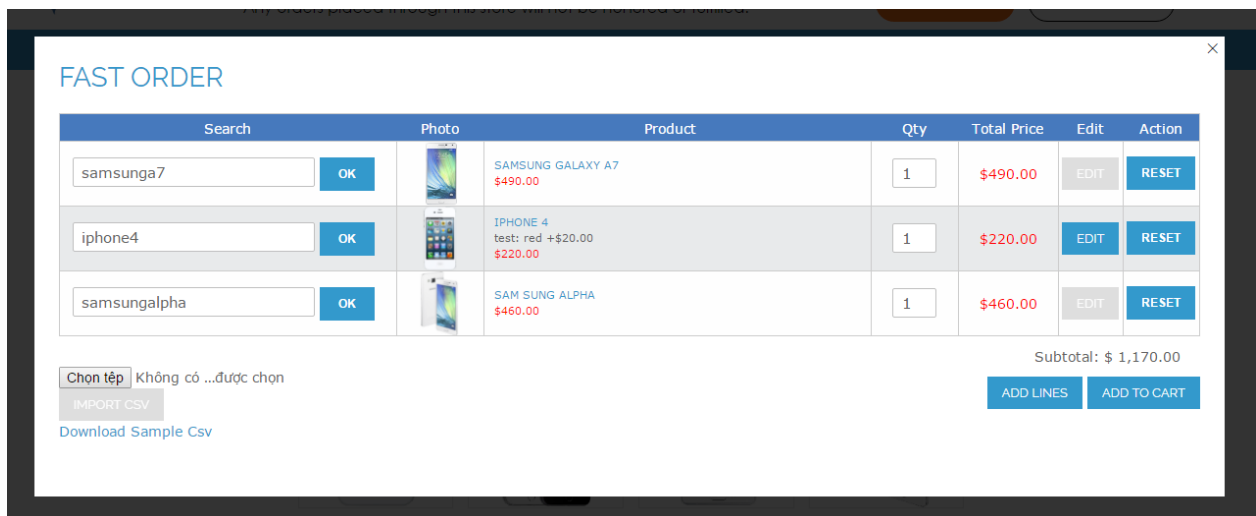

You have no items to compare.

Step 2: Search products by typing names or SKU in the search boxes of the Fast Order pop up

There will be some suggestions for customers to choose and both names and SKUs are included in the search results with the highlighted search keyword.

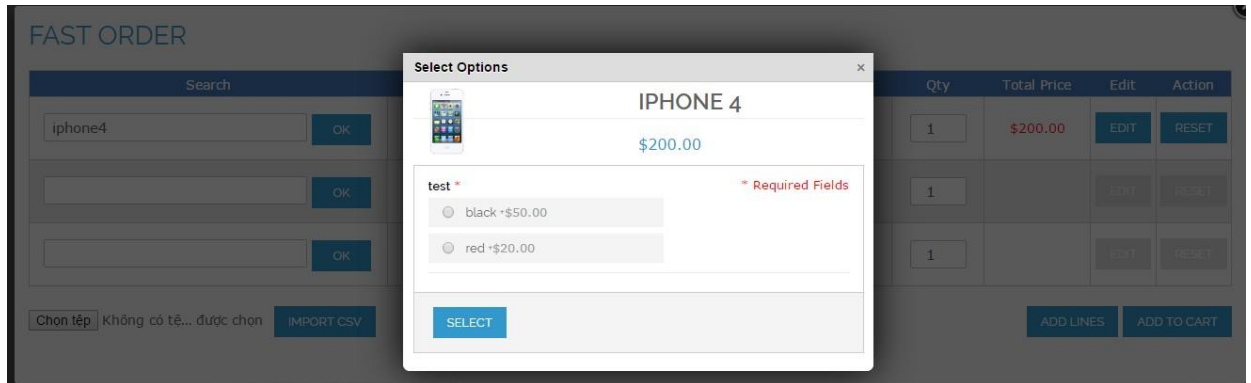

Step 3: Select your wanted products with quantity and add them to cart

In addition, customers also import a CSV file of products that they can download a sample right on the popup (just require product name and SKU) to carry out the buying

process faster without spending much time. If customers search for a configurable product, Wholesale Fast Order displays custom options of attributes in a pop up to choose. Moreover, you can edit product attributes and other custom options by clicking “EDIT” button.

Step 4: Customers can also view your shopping cart page to see chosen products

Step 5: Process to checkout right after adding products into cart. The grand total will be automatically calculated as you add multiple desired items to cart at a time.

2. How to configure BSS Wholesale Fast in the backend

For Admin Configuration, go through “**System > Configuration > BSS Commerce > Fast Order**”.

Enabled	Yes ▼	[STORE VIEW]
Fast Order Display	Popup ▼	[STORE VIEW]
Enabled JQuery Library	Yes ▼	[STORE VIEW]
Max results to show	50	[STORE VIEW]
	▲ Number of results in the autocomplete box.	
Autocomplete minimum characters	2	[STORE VIEW]
	▲ Minimum number of characters before displaying the autocomplete results.	
Enable search by SKU	No ▼	[STORE VIEW]
	▲ The autocomplete feature will search by NAME for default	
Number of lines *	2	[STORE VIEW]
	▲ Default lines showed in.	
Show Not Visible Products	Yes ▼	[STORE VIEW]
	▲ Choose 'yes' to enable search simple product not visible.	

In **Enabled**: You can switch on/switch off Whole Sale Fast Order by choosing **Yes** or **No** it in the back end.

In **Fast Order Display**:

- Choose **Popup** to display Fast order function in a Popup. It will display a Fast Order shortcut in Magento default topline. If the site does not have topline or topline has been edited this setting does not take effect. To put Fast Order shortcut to your wanted position please insert this html into the file you want the shortcut will display:

```
<a href="domain/fastorder/ajax/loadform/" title="Fast Order" class="bss-fastorder" data-featherlight="ajax">Fast Order</a>
```

- Select **CMS Page** if you want to show Fast Order in a CMS Page. It's required to create a CMS Page from Admin panel and add this code below into its content.

```
{{block type="core/template" template="bss/fastorder/form.phtml}}
```

In **Enabled jQuery Library**:

- Choose **Yes** to enable jQuery Library to run things related to jQuery.
- Choose **No** if your site already has jQuery Library already because it will cause some conflicts.

In **Autocomplete minimum characters**: you set the minimum characters customers have to type in the search box so that the result can appear.

In **Max results to show**: you set the number of results displayed in the autocomplete box

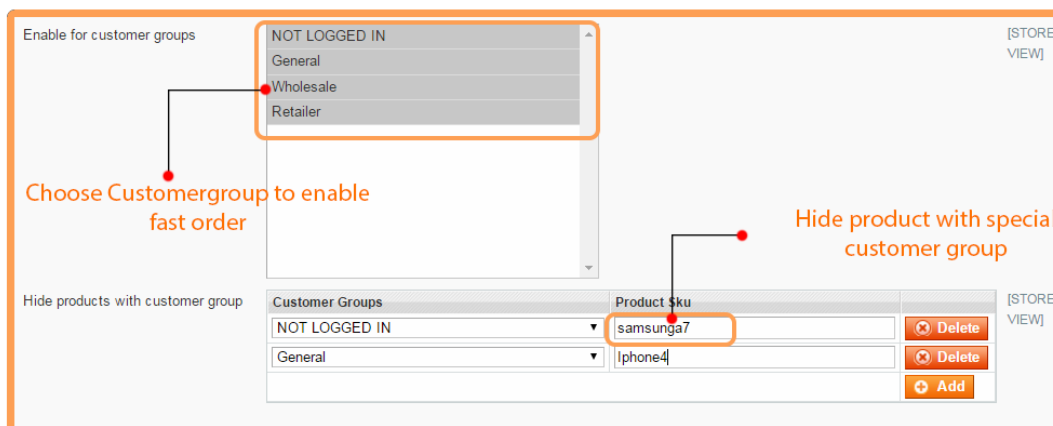

In **Enabled search by SKU**:

- Choose Yes to enable customers to search by SKUs
- Choose No and customers can only search by names as default

In **Number of lines**: you set the number of lines of Fast Order shown in the pop up

In **Show Not Visible Products**

- Choose Yes to enable search for not visible products
- Choose No to disable this function

In **Enable for customer groups**: you choose group for whom you do not want to enable Wholesale Fast Order

In **Hide products with customer group**: You click “Add” to choose customer group and add product names or SKU that will be hidden from this group.

Enabled customer's session	<input type="text" value="No"/>	[STORE VIEW]
Decimal Separator	<input type="text" value="."/>	[STORE VIEW]

In **Enabled customer's session**: Choose Yes to enable it or choose No to disable this function

In **Decimal Separator**: You customize decimal separator depending currency you want
