1. Wholesale Fast Order Overview

Recently many researches have proved that even one second delay in buying process can engage your loyal customers in abandoning your online store. Therefore, you can enhance your online store performance and encourage customers to start searching and selecting products by using [Wholesale Fast Order](#) by BSS Commerce right now.

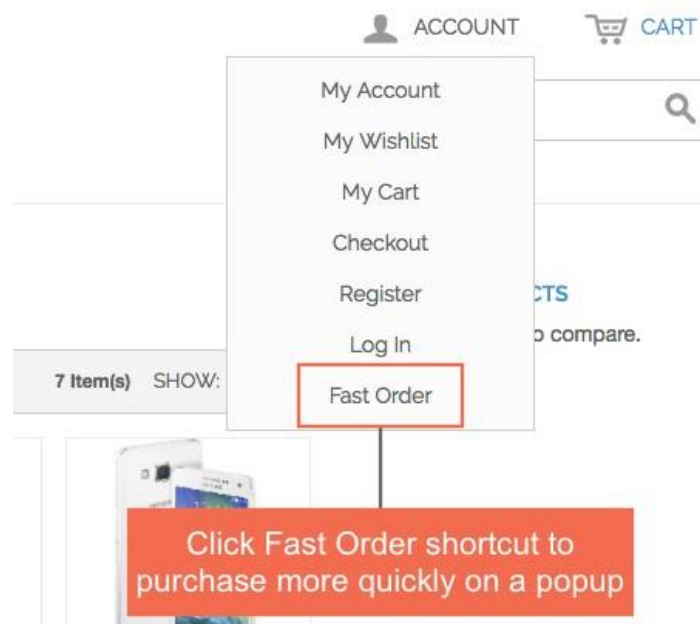

2. How does Wholesale Fast Order Extension work?

2.1. How to use functions of BSS Wholesale Fast Order Extension

Wholesale Fast Order is a very useful extension that allows selecting multiple products at the same time and then adding them to shopping cart without spending too much time purchasing one by one. By this way, Wholesale Fast Order can optimize order process and decrease buying time by following these steps:

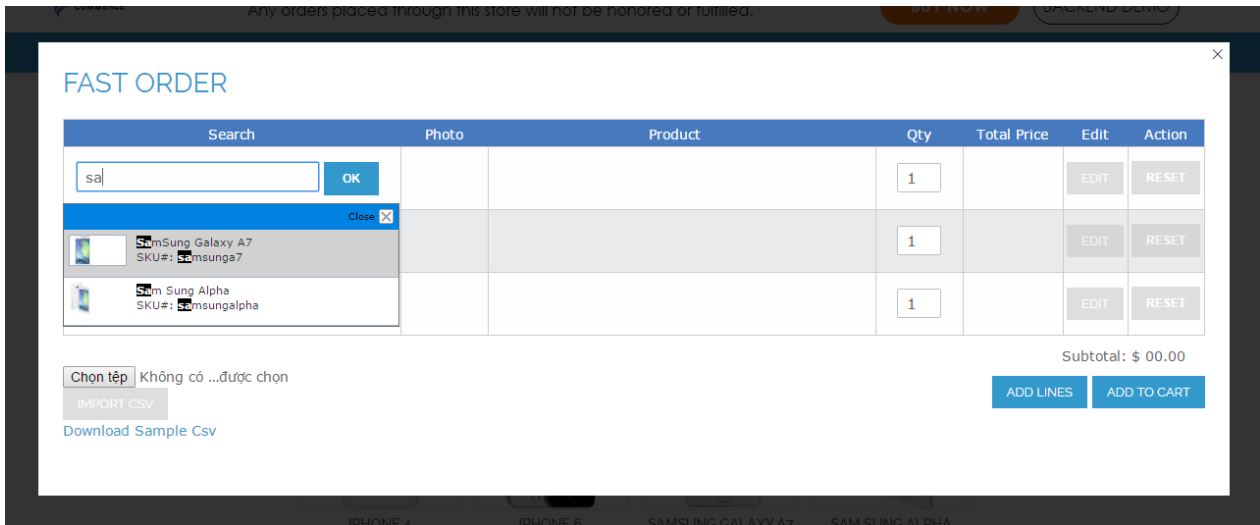

Step 1: Click “**Fast Order**” shortcut in the right side of the website

When you install BSS Wholesale Fast Order Extension, Fast Order shortcut will appear in the right side of your website. Customers click to Fast Order shortcut and there is a Fast Order pop up for them to search.

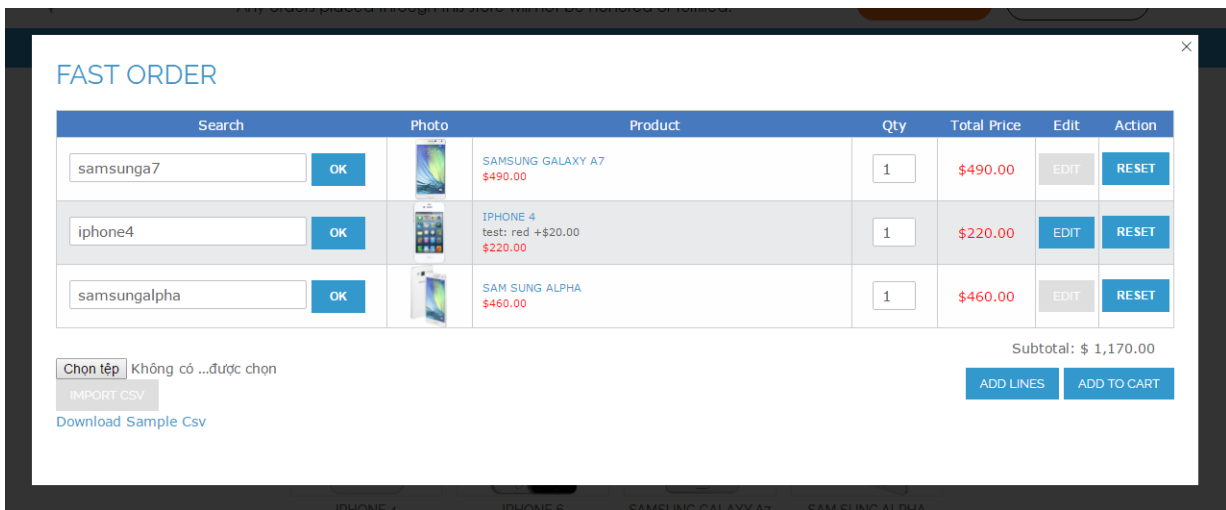

Step 2: Search products by typing names or SKU in the search boxes of the Fast Order pop up

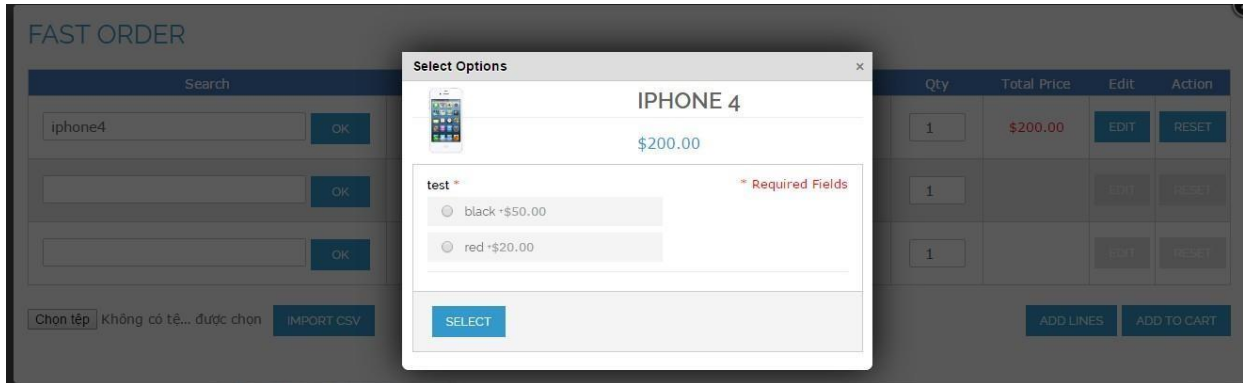

There will be some suggestions for customers to choose and both names and SKUs are included in the search results with the highlighted search keyword.

Step 3: Select your wanted products with quantity and add them to cart.

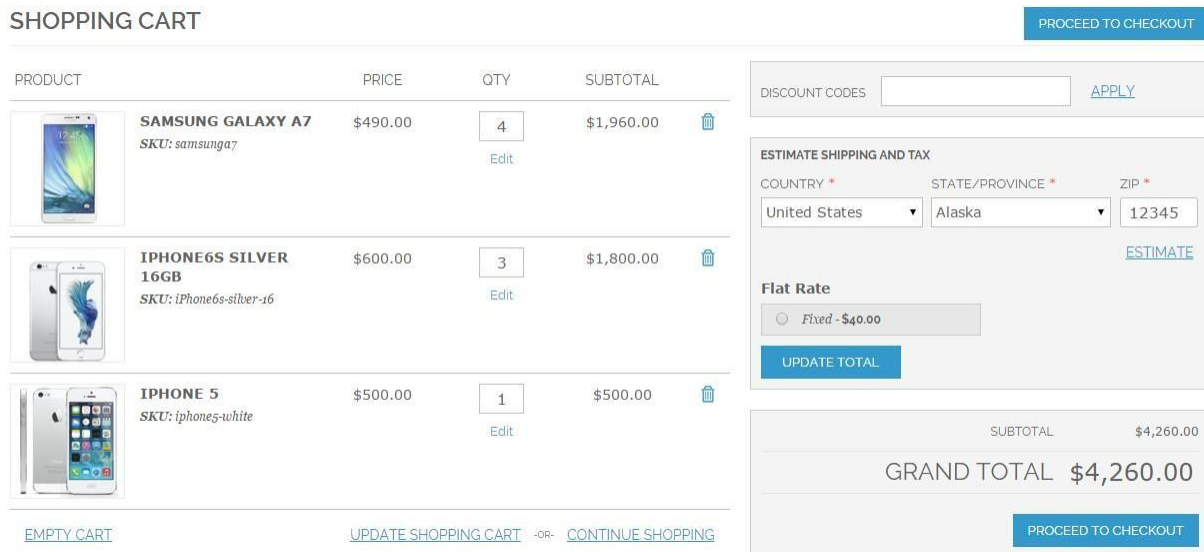

In addition, customers also import a CSV file of products that they can download a sample right on the popup (just require product name and SKU) to carry out the buying process faster without spending much time. If customers search for a configurable product, Wholesale Fast Order displays custom options of attributes in a pop up to choose. Moreover, you can edit product attributes and other custom options by clicking “EDIT” button.

Step 4: Customers can also view your shopping cart page to see chosen products

Step 5: Process to checkout right after adding products into cart. The grand total will be automatically calculated as you add multiple desired items to cart at a time.

2.2. How to configure BSS Wholesale Fast in the backend

For Admin Configuration, go through “**System → Configuration → BSS Commerce → Fast Order**”.

Enabled	<input type="text" value="Yes"/>	[STORE VIEW]
Fast Order Display	<input type="text" value="Popup"/>	[STORE VIEW]
Enabled jQuery Library	<input type="text" value="Yes"/>	[STORE VIEW]
Max results to show	<input type="text" value="50"/> <small>▲ Number of results in the autocomplete box.</small>	[STORE VIEW]
Autocomplete minimum characters	<input type="text" value="2"/> <small>▲ Minimum number of characters before displaying the autocomplete results.</small>	[STORE VIEW]
Enable search by SKU	<input type="text" value="No"/> <small>▲ The autocomplete feature will search by NAME for default</small>	[STORE VIEW]
Number of lines *	<input type="text" value="2"/> <small>▲ Default lines showed in.</small>	[STORE VIEW]
Show Not Visible Products	<input type="text" value="Yes"/> <small>▲ Choose 'yes' to enable search simple product not visible.</small>	[STORE VIEW]

In **Enabled**: You can switch on/switch off Whole Sale Fast Order by choosing **Yes** or **No** it in the back end.

In **Fast Order Display**:

- Choose **Popup** to display Fast order function in a Popup. It will display a Fast Order shortcut in Magento default topline. If the site does not have topline or topline has been edited this setting does not take effect. To put Fast Order shortcut to your wanted position please insert this html into the file you want the shortcut will display:

```
<a href="domain/fastorder/ajax/loadform/" title="Fast Order" class="bss-fastorder" data-featherlight="ajax">Fast Order</a>
```

- Select **CMS Page** if you want to show Fast Order in a CMS Page. It's required to create a CMS Page from Admin panel and add this code below into its content.

```
{{block type="core/template" template="bss/fastorder/form.phtml}}
```

In **Enabled jQuery Library:**

- Choose **Yes** to enable jQuery Library to run things related to jQuery.
- Choose **No** if your site already has jQuery Library already because it will cause some conflicts.

In **Autocomplete minimum characters:** you set the minimum characters customers have to type in the search box so that the result can appear.

In **Max results to show:** you set the number of results displayed in the autocomplete box.

In **Enabled search by SKU:**

- Choose **Yes** to enable customers to search by SKUs.
- Choose **No** and customers can only search by names as default.

In **Number of lines:** you set the number of lines of Fast Order shown in the popup.

In **Show Not Visible Products:**

- Choose **Yes** to enable search for not visible products.
- Choose **No** to disable this function.

The screenshot shows the configuration interface for the Wholesale Fast Order Extension. It features three main sections:

- Enable for customer groups:** A dropdown menu currently set to "NOT LOGGED IN". A callout box points to this dropdown with the text: "Choose which customer group to enable Fast Order".
- Hide products with customer group:** A table with columns for "Customer Groups" and "Product Sku". The "Customer Groups" column has a dropdown menu set to "NOT LOGGED IN". There are "Delete" and "Add" buttons. A callout box points to the "Add" button with the text: "Hide products from special customer groups".
- Enabled customer's session:** A dropdown menu set to "Yes".

In **Enable for customer groups**: you choose group for whom you do not want to enable Wholesale Fast Order

In **Hide products with customer group**: You click “Add” to choose customer group and add product names or SKU that will be hidden from this group.

In **Enabled customer’s session**:

- Choose **Yes**: it will save your customer’s session on Fast Order form, so when they go to other page. and open the form again, the products they chose are still there.
- If you choose **No**: the chosen products which are not added to cart will be gone when customers navigate to another page.
