1. Checkout Success Page Extension Overview

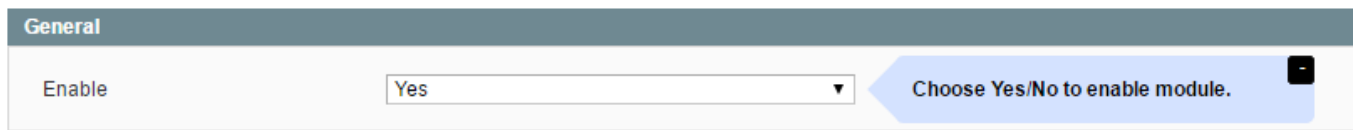

[Checkout Success Page Extension](#) allows admin to tweak the success page or also called “thank you page” for better sales conversion. The Success page, which appears when customer’s order process is accomplished, is often forgotten by many Magento users. Interestingly, this page can be of much value when admin know how to make use of it properly. Our Checkout Success Page Extension is designed with the hope to help you utilize the success page to empower your sale.

2. How Does Checkout Success Page Extension Work?

Please navigate to System → Configuration → BSS COMMERCE → Checkout Success Page.

There are 6 sections for admin to continue configuring the extension: General, Order Information Section, Newsletter Subscription Section, Cross Sell Block Section, CMS Block Section, Social Network Sharing Section.

2.1. General Settings

In Enable, choose Yes to enable the extension or No to disable it.

2.2. Order Information Section

Order Information Section

Enable: Yes

Order Information: Left

Custom Message: Thank you for purchasing at our store. Your order has been received and will be processed as soon as possible.

[STORE VIEW] Choose Right/Left to set up the position for Order Information Section.

Type message you want to show for customers.

In **Enable**, choose Yes to enable appearing order’s detail information on the Checkout Success page. Otherwise, choose No.

In **Order Information**, decide the position of order information: left or right.

In **Custom Message**, enter the thank you message you want to show in Checkout Success Page.

2.3. Newsletter Subscription Section

Newsletter Subscription Section

Enable: Yes

Sort Order:

Enable to show Newsletter Subscription Section.

[STORE VIEW]

In **Enable**, choose Yes to enable newsletter subscription section on Checkout Success page. Otherwise, choose No.

In **Sort Order**, enter a number to set position of the section on Checkout Success page. (E.g: if you insert “1” => it will appear on the first position on page).

2.4. Suggest Product Block Section

Suggest Products Block Section		
Enable	Yes <input type="text"/>	Select which block of product will be shown. <input type="checkbox"/>
