## 1. Multiple Store View Pricing for Magento 2 Extension Overview

[Multiple Store View Pricing for Magento 2](#) extension helps store owners to set up different prices for the same product in various store views of a store while Magento 2 default does not support this function. For example, you want to sell a table at £50 in English store view but in the French store view, the price you want customers to pay is €80. Therefore, it totally depends on demands of store owners as well as business strategies for each local target customers.

Moreover, this module also allows administrators to set up base currency for each store view so that customers can easily checkout with currency of store view. It can be said that this is really another very outstanding feature of Multiple Store View Pricing for Magento 2 to make more convenient for both customers and store owners.

## 2. How Does Multiple Store View Pricing for Magento 2 Extension Work?

### 2.1. Enable Multiple Store View Pricing for Magento 2 extension

Please go to **Stores → Configuration → Catalog**.

The screenshot shows the 'Configuration' page for the 'Catalog' section. The 'Price' section is expanded, and the 'Catalog Price Scope' dropdown menu is set to 'Store View'. A red box highlights the 'Store View' option, and another red box contains the text 'Choose "Store View" then click "Save Config" button'. A 'Save Config' button is visible in the top right corner.

In **Catalog Price Scope**, there are 3 options for admin to choose: **Global**, **Website** and **Store View**. You choose **Store View** to enable the module.

Then you click **Save Config** and begin to customize prices of products in each store view of each store.

\*Note: After saving config, you need to do the following things:

- + Reindex catalog price by running `php bin/magento indexer:reindex catalog_product_price` so that prices can be reindexed according to each store.
- + Reindex catalog price rules.

## 2.2. Setup base currency for each store view

### 2.2.1. Set up base currency for English store view

In **Configuration**, you go to **General** → **Currency Setup** to set up base currency for English store view.

- ✓ Choose **English** store view from **Store View** Section.

The screenshot shows the 'Currency Options' configuration page for the 'English' store view. The 'Store View' dropdown is set to 'English'. The 'Base Currency' is set to 'British Pound Sterling'. The 'Default Display Currency' is also set to 'British Pound Sterling'. The 'Allowed Currencies' list includes various currencies like Afghan Afghani, Albanian Lek, Algerian Dinar, Angolan Kwanza, Argentine Peso, Armenian Dram, Aruban Florin, Australian Dollar, Azerbaijani Manat, and Azerbaijani Manat (1993-2006). Red callout boxes highlight the 'Store View' dropdown, the 'Base Currency' dropdown, and the 'Currency Setup' menu item.

- ✓ In **Base Currency**: Choose **British Pound Sterling** as base currency and customers will use this one to checkout.
- ✓ In **Default Display Currency**: you can choose **British Pound Sterling** or any other currency because this one is only displayed in the product or category page, not used in the checkout.

- ✓ In **Allowed Currencies**: Choose **British Pound Sterling**.

Then, click to **Save config** button.

### 2.2.2. Set up base currency for French store view

In **Configuration**, you go to **General** → **Currency Setup** to set up base currency for French store view.

- ✓ Choose **French** store view from **Store View** Section.

- ✓ In **Default Display Currency**: you can choose **Euro** or any other currency because this one is only displayed in the product or category page, not used in the checkout.
- ✓ In **Allowed Currencies**: Choose **Euro**.

Then, click to **Save config** button.

## 2.3. Set up different prices for a product in store views of a store

### 2.3.1. Set up price for a product in English store view: Put It Messenger Bag

The screenshot shows the Magento 2 product configuration interface. At the top, the 'Store View' is set to 'English'. Below this, there are several configuration options:

- Enable Product [website]:** A toggle switch is turned 'Yes', and the 'Use Default Value' checkbox is checked.
- Attribute Set:** A dropdown menu is set to 'Bag'.
- Product Name [store view]:** The text 'Push It Messenger Bag' is entered, and the 'Use Default Value' checkbox is checked.
- SKU [global]:** The text '24-WB04' is entered.
- Price [store view]:** The text '£ 100.00' is entered. This field is highlighted with a red box, and a red callout box points to it with the text 'Set up product price for English store view'. The 'Use Default Value' checkbox is unchecked.

At the bottom of the 'Price' field, there is a link for 'Advanced Pricing'.

**Step 1:** Choose **English** in Store View box.

**Step 2:** In **Price** section, you unmark “**Use Default Value**” and add your wanted price for the product in this English store view: £100, for instance.

In addition, you can also set up Special Prices for this product by clicking Advanced Pricing.

**Step 3:** You save configuration and see changes in the frontend.

➤ **Price of Put It Messenger Bag in the English store view:**

The screenshot shows the product page for 'Push It Messenger Bag' on the LUMA website. The page is in the English store view. The product price is displayed as £100.00, which is highlighted with a red box and labeled 'Price in English store view'. The product is in stock, with a SKU of 24-WB04. The page includes a navigation menu with categories like 'What's New', 'Women', 'Men', 'Gear', 'Training', and 'Sale'. The product image is a grey and blue messenger bag.

### 2.3.2. Set up price for a product in French store view: Put It Messenger Bag

**Step 1:** Choose **French** in **Store View** box.

**Step 2:** In **Price** section, you unmark “**Use Default Value**” and add your wanted price for the product in this French store view: €200, for instance.

**Step 3:** You save configuration and go to the frontend to see the changes:

➤ **Price of Put It Messenger Bag in the French store view:**

The screenshot shows the LUMA website interface. At the top, there's a navigation bar with 'Default welcome msg!', 'Sign In or Create an Account', and a language dropdown set to 'French'. Below this is the LUMA logo and a 'French Store View' button. A main navigation menu lists 'What's New', 'Women', 'Men', 'Gear', 'Training', and 'Sale'. The breadcrumb trail shows 'Home > Push It Messenger Bag'. The product title is 'Push It Messenger Bag', with a note 'Be the first to review this product'. The price is '€200.00', which is circled in red and has a callout box saying 'Price in French store view'. The product is 'IN STOCK' with 'SKU#: 24-WB04'. There's a quantity selector set to '1' and an 'Add to Cart' button. At the bottom, there are links for 'ADD TO WISH LIST', 'ADD TO COMPARE', and 'EMAIL'.

As a result, you can set up different price for a product: **Put It Messenger Bag** in two store views.

### 3. Some Notes about Multiple Store View Pricing for Magento 2 version 2.0.3

In case you use Multiple Store View Pricing with [Catalog Price Rule per Store View](#) (Magento 2), please take some following notices:

- To make Catalog Price Rule per Store View work with Multiple Store View Pricing, you go to the `app/etc/config.xml` file of Magento, find this line `'Bss_MultiStoreViewPricingCatalogRule' => 1` and then you replace this line by another line `'Bss_MultiStoreViewPricingCatalogRule' => 0`
- Flush cache

You should reindex after setting up or editing catalog price rules.

When you add a new store, you also need to reindex.

When you edit prices of simple products of bundle products and group products in each store and then go to the category including these products, the prices are not changed. Because it is the way that the core is solving.

When you sort by or filter, default Magento does not take special price of simple products of configurable products. It will sort or filter based on the original price of configurable products.
